## EDUCATION

**UNIVERSITY OF SOUTHERN CALIFORNIA** – Los Angeles, CA — Expected May 2028

Bachelor of Science in *Computer Science Games*

**AWARDS:** HSF Scholar, HITEC Scholar, QuestBridge Scholar

**RELEVANT COURSES**: Video Game Programming, Mobile Game Development, Game Design Workshop, Data Structures

## TECHNICAL SKILLS

**PROGRAMMING LANGUAGES**: C++, C#, Java, JavaScript, Python

**TOOLS**: Unity, Perforce, Git/GitHub, Ink, Adobe Creative Suite, Figma

**LANGUAGES (spoken)**: English, Spanish (bilingual)

## GAME PROJECTS

**Ur So Messy!** - CTIN 489: Intermediate Game Design Workshop — Sep 2026 - Present

*Co-Creator, Gameplay Programmer & Technical Designer*

- Programmed the matching mini-game on a 2-person team, including card spawning, match checking, and a timer.
- Built a data-driven affection system with ScriptableObjects, where mini-game results shape each date.
- Wrote custom shaders that desaturate and hue-shift cards to scale difficulty, migrating to URP for Shader Graph.
- Implemented day progression and per-chat dialogue state with Ink, unlocking new suitors each day.

**Homesick** - Solo Project — Sep 2026 - Oct 2026

*Sole Developer*

- Built a first-person narrative game in Unity where players relive family memories while packing up a childhood home.
- Implemented fade-to-black memory sequences on unscaled time and a trigger-based packing goal that ends the game.
- Designed a data-driven memory system with ScriptableObjects, so new memories need no new code.
- Programmed sphere-cast pickup and kinematic holding, fixing physics jitter and player-collision bugs.

**Open Your Browser (OYB)** - Open Alpha — Jan 2025 - May 2025

*Game Design Lead*

- Co-led a 10-person design team to ship a game on itch.io, directing characters, dialogue, and world-building.
- Translated designs into clear specs for programmers and answered functionality questions to keep the game in scope.

## PROFESSIONAL EXPERIENCE

**Booz Allen Hamilton** - El Segundo, CA — Jun 2026 - Aug 2026

*Software Engineering Intern*

- Built a real-time 3D globe in React Three Fiber showing satellite orbits, ground assets, and coverage areas.
- Created timeline playback, scheduling, and constellation-control tools for simulating satellite missions.
- Led frontend and UX across 80+ React components, designing the landing page, 3D intro, logo, and visual identity.
- Integrated REST APIs for mission-plan storage, location data, and live satellite orbit (TLE) updates.

**Lvl∞nity** - Los Angeles, CA — Jan 2026 - Present

Co-Founder, *Backend & Full-stack Developer*

- Co-founded a game-inspired social platform for collaborative project sharing, built with React and Firebase.
- Architected the database schema and REST APIs powering user profiles and project sharing.
- Implemented secure authentication flows and core backend business logic.
- Built end-to-end features connecting responsive React interfaces to backend services.

**USC Games Career Center** - Los Angeles, CA — Sep 2026 - Present

*Student Assistant*

- Coordinate career fairs, workshops, and recruiter events connecting USC Games students with studios and alumni.

## LEADERSHIP

**Society of Hispanic Professional Engineers (SHPE)** — Aug 2024 - Present

*Co-Vice President of Marketing*

- Co-lead chapter marketing across social media and events, helping double mentorship sign-ups year over year.
- Design branded flyers, graphics, and digital content for chapter events and recruitment.
